Vape Carton Dieline — Template 2

Pen-style devices and cartridge-plus-battery kits · reverse tuck end

Cartridge + battery kit carton

Finished 95 × 75 × 28 mm · shown at 1:1 on A3 landscape

Adapt the front and side panels to your measured pen envelope (battery attached), then recheck the wider blank on your planned auto-gluer.

Insert-supported builds (EVA, molded pulp) need extra depth and clearance; direct-fit paperboard keeps MOQ and setup lower.

PEN VARIANT — fill in your measured numbers

L _____ mm W _____ mm D _____ mm

Cap protrusion _____ mm Battery attached: yes / no

Board caliper _____ gsm / pt Score residual 45–55%

Download PDF, print at 100% (actual size). Scores: 45–55% residual board thickness. Bleed: 3 mm outside every cut edge.

Starting template, not a universal standard. Confirm board caliper, score tolerance, flap taper, and gluer settings before production. No artwork. 3 mm bleed · 3 mm safe zone. © 2026 LeelinePackage.
